Skills

Java	Windows	Spring Boot	Git
Python	MacOS	Spring Security	IntelliJ
JavaScript	Linux	Hibernate	VSCode

Professional Objective

Looking for a position that will bridge my experience dealing with and thinking about abstract questions and my love for technical, detail-oriented deep work. Forever formulating a concise and expressive answer, be it a line of code or sentence.

Project Experience

Sendfriend – github.com/mrkish/sendfriend

Journaling and social media platform for climbers to share notes and track personal performance.

- Java and Spring MVC backend, with React elements to display user statistics.
- Combines CRUD functionality with sharing specific notes (aka "beta") with other users added as "friends".
- React used for interactive UI elements.

Work Experience

Mogul Property Management, *Property Manager*

2015 – Present

- Managed day-to-day operations as a distributed site property manager.
- Coordinated leasing, maintenance, owner communication, rent collections and performance and progress reporting to company broker/owner.
- Implemented systems to manage improve maintenance reporting and transparency.
- Handled monthly accounting operations and owner distributions.

Freelance Writer, *Self-employed*

2010 - 2016

- Interviewed hundreds of people for articles; coordinated information from multiple sources and conducted research where needed to write a descriptive and engaging marketing copy.
